

Savings by Customer Type: £Bills (Ofgem Price Cap - Coop Bill) & Tonnes of CO₂e Savings

Customer Type	System Details	Initial Term Savings (8 years) per customer £	Savings over 10 years £	18 Years £	25 Years £	25 Years All Direct Customers £bn	25 Years All Direct & Wholesale Customers Tonnes Carbon Saved	Discount from Ofgem Price Cap
Residential	2.89kWp, 5kWh battery	£4,755	£8,325	£13,080	£38,189	£161.79		50.0%
Tonnes CO ₂ e Savings from grid		2	2	3	4	542,906	1,625,133	
Shared Roof (per bill paying)	2.89kWp equivalent, 4.7kWh battery	£4,101	£6,832	£10,933	£35,751	£78.94		50.0%
Tonnes CO ₂ e Savings from grid		2	2	3	3	251,757	320,232	
SME	31kWp, 62.5kWh battery	£66,467	£93,758	£160,225	£372,367	£71.30		50.0%
Tonnes CO ₂ e Savings from grid		24	27	33	43	265,543	311,433	
Community/ Public	61.5kWp, 123.75kWh battery	£84,517	£135,314	£219,831	£702,044	£244.20		50.0%
Tonnes CO ₂ e Savings from grid		44	50	63	85	265,774	288,716	
BIPV	2.89kWp, 5kWh battery	£4,591	£7,387	£11,978	£39,116	£13.61		50.0%
Tonnes CO ₂ e Savings from grid		2	2	3	4	43,764	128,502	
Total 25 years customer bill savings £bn	£570		Total average saving per member £	£80,492				
Tonnes CO ₂ e Savings from grid	MegaTonnes for all direct customers	1.37			MegaTonnes all direct & wholesale Customers	2.67		
Notes	Annual Carbon Savings (kg CO ₂ e) = Grid Electricity Avoided (kWh) × Yearly Factor kg CO ₂ /kWh from (These conversion factors come from DESNZ internal modelling, as well as published Greenhouse gas reporting: Conversion factors 2023 https://www.gov.uk/government/publications/greenhouse-gas-reporting-conversion-factors-2023) Grid Electricity Avoided = (Total Annual Usage - Annual Import Requirements).
